A WORD ABOUT THIS CATALOGUE

The choicest numismatic material is always in demand by collectors, and it is believed that the consignments of rare American gold, silver, and copper coins; foreign silver, gold rarities, and books etc. which have been herein catalogued will merit the attention of collectors whether novice, or advanced numismatist.

It is a distinct privilege to be able to offer such an outstanding array of Spanish and Spanish-American Dollars, perhaps the finest comprehensive assemblage offered in the country in years. The significance of the Hispanic series to the United States series has been largely overlooked in this country, due to the influence of those philological-minded numismatists who have presented central European thalers starting in 1486 as being the lineal ancestor of our dollar and the cradle of our coinage. Any relationship between the Teutonic coinages and those of Spain and her colonial empire in America is merely in the derivation of the word "Dollar". There is a distinct cleavage between the two systems except in this single aspect. It may be here stressed to permanently obliterate this numismatic canard that the United States dollar first coined in 1794 is directly based upon the Spanish colonial coinage system and that American historical archives prove unquestionably that the 1794 dollar and its successors were actually modeled in size, weight, and fineness from the "Pillar" and "Carolus" dollar. No other contemporary coinage was more widely circulated nor better received as a medium of exchange. Many of these specimens were the coinage in use by the American colonists throughout the 17th and 18th centuries. As such they are the forerunners of the dollar currency. Hispanic coins circulated in many states, not then but now a part of the Union, and as such the coins were legal tender until 1857. It is with pride that this collection is offered for

sale as a collection which forms an integral part of the antecedents of our American coinage system.

The fact that it includes some of the greatest rarities in the series is indeed an added feature since the rare Saragossa 1611 8 reales; the rare Lerida and Gerona 1809 duros and the virtually unique 1869 Hispania 5 pesetas are truly historically interesting and of the greatest rarity. The condition of the coins in this collection marks it as superb and shows the high degree of discrimination exercised by the former owner, in both variety of types and attention to numismatic detail.

Stress must also be directed to the splendid series of United States half cents, large cents in unusual array of die varieties, as well as mint-marked dimes, twenty cent pieces, quarters, and half dollars, and some types of United States gold.

For the collector of foreign coins these groups are included; Spanish gold, Oriental coins, foreign gold and silver crowns of all nations and a selection of numismatic books to enable collectors to enlarge their reference shelves. Such tools serve to add double enjoyment to this hobby.

The preparation of this catalog has been a pleasant if not formidable numismatic experience. The knowledge that it may have lasting usefulness to collectors has been an incentive in the accuracy of the undertaking and may justify the exhaustive research required in its preparation.
